The requirements for hardware and software

Important information: We do not advise a minimum of needed Hardware, because we know how important a well running system is for users.
No good hardware means no efficient user !!

Hardware requirements
- client machine with actual processor (Intel I5 oder I7) min. 8GB of RAM

- dedicated graphic card with a Memory of min 2GB RAM.
  good types of cards are series of NVIDIA with type description GTX
  RAM type DDR5
  1,2 Ghz
  min 700 shader units
  min 128 bit
  Shader model ab 5.0

- 40GB space on local hard disk for caching.

- Display with 19" and a solution of 1920x1080

- Mouse with scroll wheel (like Logitech M705)

Software requirements on client side
- OS Windows 8 or higher
- DirectX10 or higher
- DotNet Framework 4.7.1
- Visualstudio Runtime 2015 (32bit AND 64bit)
- MS Excel for export of data into Excel
- Admin rights for installation

Software requirements on server side
- Microsoft SQL Server 2012 or higher (Express is working too)
- SQL Server should run with activated file streaming and SQL authentication
